MCCJ 525 - Cybercrimes and Security

Assignment: Assessing Security Features of Online Platforms

Conduct an independent exploration to research on the security setting/ features of at least 05 online platforms (For example, Social media, Email platforms, P2P communication apps like WhatsApp) that you use regularly. Then write a concise report of maximum 1500 words (excluding screenshots) focusing on the following:

I. What security features are there in that user account to prevent cyber attacks/ cyber threat management?
II. What additional features do you think should be added in those platform accounts each to ensure better security and why do you think so?
III. Which platform/ apps do you think are most secured (from those you have explored) for individual users? Please add your comments.
